

(11)Publication number : 2002-091850
(43)Date of publication of application : 29.03.2002

(21)Application number : 2000-284010 (71)Applicant : TECHFIRM KK
(22)Date of filing : 19.09.2000 (72)Inventor : TSUTSUI YUICHIRO

SOLUTION: While using a download ID issued corresponding to a download request, the application is authenticated on the side of a WWW server 50 for portable telephone set. Besides, by adding a user ID or application ID and further a download date in addition to the download ID, certainty in authentication is further improved.
